## AUTHOR INDEX

Ahlstrom, J. B. *See* Humes & Ahlstrom, June, 306-310.

Amatyakul, P. *See* Gandour et al., Mar., 89-97.

Aram, D. M., Ekelman, B. L., & Nation, J. E. Preschoolers with language disorders: 10 years later. June, 232-244.

Arcos, J. G. *See* Wilson et al., June, 267-274.

Arcos, J. T. *See* Wilson et al., Sept., 378-386.

Baken, R. J. *See* Schneider & Baken, Sept., 430-435.

Bakker, K. *See* Brutten et al., Dec., 562-566.

Baltaxe, C. A. M. Use of contrastive stress in normal, aphasic, and autistic children. Mar., 97-105.

Beattie, R. C., & Boyd, R. Effects of click duration on the latency of the early evoked response. Mar., 70-76.

Bennett, L. A. *See* Wilson et al., June, 267-274.

Bilger, R. C. *See* Katsuki et al., Sept., 444-448.

Bilger, R. G., Neutzel, J. M., Rabinowitz, W. M., & Rzeczkowski, C. Standardization of a test of speech perception in noise. Mar., 32-48.

Boothroyd, A. Auditory perception of speech contrasts by subjects with sensorineural hearing loss. Mar., 134-144.

Boyd, R. *See* Beattie & Boyd, Mar., 70-76.

Bratt, G. W. *See* Humes et al., June, 206-211.

Brinton, B., & Fujiki, M. Development of topic manipulation skills in discourse. Sept., 350-358.

Brookshire, R. H., & Nicholas, L. E. Consistency of effects of slow rate and pauses on aphasic listeners' comprehension of spoken sentences. Sept., 323-328.

Brown, C. J. *See* Wilson et al., June, 267-274.

Brutten, G. J., Bakker, K., Janssen, P., & van der Meulen, S. Eye movements of stuttering and nonstuttering children during silent reading. Dec., 562-566.

Buus, S. *See* Florentine & Buus, Sept., 449-455.

Carney, A. *See* Gandour et al., Mar., 89-97.

Catts, H. W. *See* Kamhi et al., Sept., 329-338.

Catts, H. W., & Kamhi, A. G. Simplification of /s/ + stop consonant clusters: A developmental perspective. Dec., 556-561.

Cerf, A. *See* McClean et al., Sept., 342-349.

Clark, G. M. *See* Millar et al., June, 280-296.

Collins, M. J. Tone-glide discrimination: Normal and hearing-impaired listeners. Sept., 403-412.

Collins, S. R. C. *See* White & Collins, Dec., 567-570.

Conrad-Armes, D. *See* Tyler & Conrad-Armes, Mar., 106-111.

Conrad-Armes, D. *See* Tyler et al., Sept., 466-474.

Cooper, D. S. *See* Perlman et al., June, 212-219.

Cox, N. J., Seider, R. A., & Kidd, K. K. Some environmental factors and hypotheses for stuttering in families with several stutterers. Dec., 543-548.

Cullen, J. K. *See* Tobey & Cullen, Dec., 527-533.

Dale, P. S. *See* Shorr & Dale, Dec., 549-556.

Daniloff, J. K., & Vergara, D. Comparison between the motoric constraints for Amer-Ind and ASL sign formation. Mar., 76-88.

Davis, M. K. *See* Kamhi et al., Sept., 329-338.

Demorest, M. E. *See* Walden et al., Mar., 49-56.

Dines, J. *See* Tomasello et al., Sept., 359-363.

Dorman, M. F. *See* Johnson et al., Mar., 112-118.

Ekelman, B. L. *See* Aram et al., June, 232-244.

Emanuel, F. W. *See* Kallail & Emanuel, June, 245-251.

Farrar, M. J. *See* Tomasello et al., Sept., 359-363.

Fernandes, M. A. *See* Hall et al., Mar., 145-154.

Fey, M. E., & Leonard, L. B. Partner age as a variable in the conversational performance of specifically language-impaired and normal-language children. Sept., 413-423.

Florentine, M., & Buus, S. Temporal gap detection in sensorineural and simulated hearing impairments. Sept., 449-455.

Franklin, S. *See* Starkweather et al., June, 193-196.

Fujiki, M. *See* Brinton & Fujiki, Sept., 350-358.

Gandour, J., Carney, A., Nimitbunnasarn, C., & Amatyakul, P. Tonal confusions in Thai patients with sensorineural hearing loss. Mar., 89-97.

Gandour, J., & Weinberg, B. Production of intonation and contrastive stress in electrolaryngeal speech. Dec., 605-612.

Gantz, B. J. *See* Tyler et al., Dec., 596-604.

Gelfand, S. A. *See* Silman et al., Mar., 12-19.

Geller, D., & Margolis, R. H. Magnitude estimation of loudness I: Application to hearing aid selection. Mar., 20-27.

Gilbert, H. R., Potter, C. R., & Hoodin, R. Laryngograph as a measure of vocal fold contact area. June, 178-182.

Goldsmith, H. *See* McClean et al., Sept., 342-349.

Gordon-Salant, S. Effects of reducing low-frequency amplification on consonant perception in quiet and noise. Dec., 483-493.

Gorga, M. P. *See* Rines et al., Dec., 627-633.

Guillemin, B. J., & Nguyen, D. T. Microprocessor-based speech processing system. June, 311-317.

Gutkin, B. *See* Healey & Gutkin, June, 219-225.

Hall, J. W., Tyler, R. S., & Fernandes, M. A. Factors influencing the masking level difference in cochlear hearing-impaired and normal-hearing listeners. Mar., 145-154.

Hall, J. W., & Wood, E. J. Stimulus duration and frequency discrimination for normal-hearing and hearing-impaired subjects. June, 252-256.

Harding, M. A. *See* Parnell et al., June, 297-305.

Haroldson, S. R. *See* Martin et al., Dec., 518-527.

Healey, E. C., & Gutkin, B. Analysis of stutterers' voice onset times and fundamental frequency contours during fluency. June, 219-225.

Hepler, E. L. *See* Walden et al., Mar., 49-56.

Hoffmann, K. *See* Shriberg et al., Sept., 456-465.

Hoodin, R. *See* Gilbert et al., June, 178-182.

Houde, R. A. *See* Schiavetti et al., Dec., 623-626.

Humes, L. E., & Ahlstrom, J. B. Relation between reaction time and loudness. June, 306-310.

Humes, L. E., Tharpe, A. M., & Bratt, G. W. Validity of hearing thresholds obtained from the rising portion of the audiogram in sensorineural hearing loss. June, 206-211.

Izdebski, K. *See* Shipp et al., June, 173-178.

Janssen, P. *See* Brutten et al., Dec., 562-566.

Jayaram, M. Distribution of stuttering in sentences: Reliability to sentence length and clause position. Sept., 338-341.

Jesteadt, W. *See* Stelmachowicz & Jesteadt, Sept., 396-402.

Johnson, D., Whaley, P., & Dorman, M. F. Processing of cues for stop consonant voicing by young hearing-impaired listeners. Mar., 112-118.

## SUBJECT INDEX

### HEARING

#### NATURE OF HEARING AND ITS DISORDERS

##### Normal Auditory Systems

Acoustic-reflex adaptation: Morphology and half-life data for subjects with normal hearing. Wilson, R. H., McCullough, J. K., & Lilly, D. J. Dec., 586-595.
Effects of click duration on the latency of the early evoked response. Beattie, R. C., & Boyd, R. Mar., 70-76.
Masked and unmasked pure-tone thresholds of infants and adults: Development of auditory frequency selectivity and sensitivity. Nozza, R. J., & Wilson, W. R. Dec., 613-622.
Masking-level difference in filtered-random and amplitude-modulated noise. Wilson, R. H., Arcos, J. G., Brown, C. J., & Bennett, L. A. June, 267-274.
Psychophysical tuning curves in normal-hearing listeners: Test reliability and probe level effects. Stelmachowicz, P. G., & Jesteadt, W. Sept., 396-402.
Temporal gap detection in sensorineural and simulated hearing impairments. Florentine, M., & Buus, S. Sept., 449-455.
Tone-glide discrimination: Normal and hearing-impaired listeners. Collins, M. J. Sept., 403-412.
Tympanometric changes at 226 Hz and 678 Hz across 10 trials and for two directions of ear canal pressure change. Wilson, R. H., Shanks, J. E., & Kaplan, S. K. June, 257-266.
Word recognition with segmented-alternated CVC words: A preliminary report on listeners with normal hearing. Wilson, R. H., Arcos, J. T., & Jones, H. C. Sept., 378-386.

##### Auditory and Other Otic Pathologies

Equal-loudness contours using subjective tinnitus as the standard. Penner, M. J. June, 274-279.

##### Hearing Loss and Deafness

Auditory perception of speech contrasts by subjects with sensorineural hearing loss. Boothroyd, A. Mar., 134-144.
Effect of age on prediction with the bivariate plotting procedure. Silman, S., Silverman, C. A., Showers, T., & Gelfand, S. A. Mar., 12-19.
Effects of click duration on the latency of the early evoked response. Beattie, R. C., & Boyd, R. Mar., 70-76.
Equal-loudness contours using subjective tinnitus as the standard. Penner, M. J. June, 274-279.
Initial Iowa results with the multichannel cochlear implant from Melbourne. Tyler, R. S., Lowder, M. W., Otto, S. R., Preece, J. P., Gantz, B. J., & McCabe, B. F. Dec., 596-604.
Magnitude estimation of loudness I: Application to hearing aid selection. Geller, D., & Margolis, R. H. Mar., 20-27.
Magnitude estimation of loudness II: Loudness perception in presbycusic listeners. Knight, K. K., & Margolis, R. H. Mar., 28-32.
Masking of tinnitus compared to masking of pure tones. Tyler, R. S., & Conrad-Armes, D. Mar., 106-111.
Postmasking effects of sensorineural tinnitus: A preliminary investigation. Tyler, R. S., Conrad-Armes, D., & Smith, P. A. Sept., 466-474.
Processing of cues for stop consonant voicing by young hearing-impaired listeners. Johnson, D., Whaley, P., & Dorman, M. F. Mar., 112-118.
Speech processing for cochlear implant prostheses. Millar, J. B., Tong, Y. C., & Clark, G. M. June, 280-296.
Standardization of a test of speech perception in noise. Bilger, R. C., Neutzel, J. M., Rabinowitz, W. M., & Rzeczkowski, C. Mar., 32-48.
Stimulus duration and frequency discrimination for normal-hearing and hearing-impaired subjects. Hall, J. W., & Wood, E. J. June, 252-256.
Temporal gap detection in sensorineural and simulated hearing impairments. Florentine, M., & Buus, S. Sept., 449-455.
Tone-glide discrimination: Normal and hearing-impaired listeners. Collins, M. J. Sept., 403-412.
Validity of hearing thresholds obtained from the rising portion of the audiogram in sensorineural hearing loss. Humes, L. E., Tharpe, A. M., & Bratt, G. W. June, 206-211.
Visual evoked-response components related to speechreading and spatial skills in hearing and hearing-impaired adults. Samar, V. J., & Sims, D. G. June, 162-172.

#### ASSESSMENT OF HEARING

##### Psychoacoustics

Equal-loudness contours using subjective tinnitus as the standard. Penner, M. J. June, 274-279.
Factors influencing the masking level difference in cochlear hearing-impaired and normal-hearing listeners. Hall, J. W., Tyler, R. S., & Fernandes, M. A. Mar., 145-154.

Harmonics-to-noise ratio and psychophysical measurement of the degree of hoarseness. Yumoto, E., Sasaki, Y., & Okamura, H. Mar., 2-6.
Magnitude estimation of loudness I: Application to hearing aid selection. Geller, D., & Margolis, R. H. Mar., 20-27.
Magnitude estimation of loudness II: Loudness perception in presbycusic listeners. Knight, K. K., & Margolis, R. H. Mar., 28-32.
Masked and unmasked pure-tone thresholds of infants and adults: Development of auditory frequency selectivity and sensitivity. Nozza, R. J., & Wilson, W. R. Dec., 613-622.
Masking of tinnitus compared to masking of pure tones. Tyler, R. S., & Conrad-Armes, D. Mar., 106-111.
Masking-level difference in filtered-random and amplitude-modulated noise. Wilson, R. H., Arcos, J. G., Brown, C. J., & Bennett, L. A. June, 267-274.
Postmasking effects of sensorineural tinnitus: A preliminary investigation. Tyler, R. S., Conrad-Armes, D., & Smith, P. A. Sept., 466-474.
Psychophysical tuning curves in normal-hearing listeners: Test reliability and probe level effects. Stelmachowicz, P. G., & Jesteadt, W. Sept., 396-402.
Relation between reaction time and loudness. Humes, L. E., & Ahlstrom, J. B. June, 306-310.
Stimulus duration and frequency discrimination for normal-hearing and hearing-impaired subjects. Hall, J. W., & Wood, E. J. June, 252-256.
Temporal gap detection in sensorineural and simulated hearing impairments. Florentine, M., & Buus, S. Sept., 449-455.
Temporal integration of tone glides by children with auditory-memory and reading problems. Tobey, E. A., & Cullen, J. K. Dec., 527-533.
Tonal confusions in Thai patients with sensorineural hearing loss. Gandour, J., Carney, A., Nimitbunnasarn, C., & Amatyakul, P. Mar., 89-97.
Tone-glide discrimination: Normal and hearing-impaired listeners. Collins, M. J. Sept., 403-412.
Validity of hearing thresholds obtained from the rising portion of the audiogram in sensorineural hearing loss. Humes, L. E., Tharpe, A. M., & Bratt, G. W. June, 206-211.

### Diagnostic Audiology—General

Effects of click duration on the latency of the early evoked response. Beattie, R. C., & Boyd, R. Mar., 70-76.
Psychophysical tuning curves in normal-hearing listeners: Test reliability and probe level effects. Stelmachowicz, P. G., & Jesteadt, W. Sept., 396-402.
Relation between reaction time and loudness. Humes, L. E., & Ahlstrom, J. B. June, 306-310.

### Specific Diagnostic Techniques and Approaches

#### Acoustic Immittance

Tympanometric changes at 226 Hz and 678 Hz across 10 trials and for two directions of ear canal pressure change. Wilson, R. H., Shanks, J. E., & Kaplan, S. K. June, 257-266.

#### Behavioral

Psychophysical tuning curves in normal-hearing listeners: Test reliability and probe level effects. Stelmachowicz, P. G., & Jesteadt, W. Sept., 396-402.

#### Electrophysiologic

Effects of click duration on the latency of the early evoked response. Beattie, R. C., & Boyd, R. Mar., 70-76.

#### Pediatric

Masked and unmasked pure-tone thresholds of infants and adults: Development of auditory frequency selectivity and sensitivity. Nozza, R. J., & Wilson, W. R. Dec., 613-622.

#### Speech

Auditory perception of speech contrasts by subjects with sensorineural hearing loss. Boothroyd, A. Mar., 134-144.
Initial Iowa results with the multichannel cochlear implant from Melbourne. Tyler, R. S., Lowder, M. W., Otto, S. R., Preece, J. P., Gantz, B. J., & McCabe, B. F. Dec., 596-604.
Standardization of a test of speech perception in noise. Bilger, R. G., Neutzel, J. M., Rabinowitz, W. M., & Rzeczkowski, C. Mar., 32-48.

#### Masking

Factors influencing the masking level difference in cochlear hearing-impaired and normal-hearing listeners. Hall, J. W., Tyler, R. S., & Fernandes, M. A. Mar., 145-154.
Masked and unmasked pure-tone thresholds of infants and adults: Development of auditory frequency selectivity and sensitivity. Nozza, R. J., & Wilson, W. R. Dec., 613-622.
Masking of tinnitus compared to masking of pure tones. Tyler, R. S., & Conrad-Armes, D. Mar., 106-111.
Postmasking effects of sensorineural tinnitus: A preliminary investigation. Tyler, R. S., Conrad-Armes, D., & Smith, P. A. Sept., 466-474.
Temporal gap detection in sensorineural and simulated hearing impairments. Florentine, M., & Buus, S. Sept., 449-455.
Validity of hearing thresholds obtained from the rising portion of the audiogram in sensorineural hearing loss. Humes, L. E., Tharpe, A. M., & Bratt, G. W. June, 206-211.

#### Intervention

### Habilitation, Rehabilitation, and Education

Self-report approach to assessing benefit derived from amplification. Walden, B. E., Demorest, M. E., & Hepler, E. L. Mar., 49-56.
Visual evoked-response components related to speechreading and spatial skills in hearing and hearing-impaired adults. Samar, V. J., & Sims, D. G. June, 162-172.

### Hearing Aids and Other Prostheses

An alternate method for determining functional gain of hearing aids. Rines, D., Stelmachowicz, P. G., & Gorga, M. P. Dec., 627-633.
Effects of reducing low-frequency amplification on consonant perception in quiet and noise. Gordon-Salant, S. Dec., 483-493.
Initial Iowa results with the multichannel cochlear implant from Melbourne. Tyler, R. S., Lowder, M. W., Otto, S. R., Preece, J. P., Gantz, B. J., & McCabe, B. F. Dec., 596-604.
Magnitude estimation of loudness I: Application to hearing aid selection. Geller, D., & Margolis, R. H. Mar., 20-27.
Self-report approach to assessing benefit derived from amplification. Walden, B. E., Demorest, M. E., & Hepler, E. L. Mar., 49-56.
Speech processing for cochlear implant prostheses. Millar, J. B., Tong, Y. C., & Clark, G. M. June, 280-296.

#### Cochlear Implants

Initial Iowa results with the multichannel cochlear implant from Melbourne. Tyler, R. S., Lowder, M. W., Otto, S. R., Preece, J. P., Gantz, B. J., & McCabe, B. F. Dec., 596-604.

## LANGUAGE

#### Nature of Normal Language

### Language Development

Answers to wh-questions: A developmental study. Parnell, M. M., Patterson, S. S., & Harding, M. A. June, 297-305.
Anticipatory imagery ability in normal and language-disabled children. Savich, P. A. Dec., 494-501.
Children's speech revisions for a familiar and an unfamiliar adult. Tomasello, M., Farrar, M. J., & Dines, J. Sept., 359-363.
Development of topic manipulation skills in discourse. Brinton, B., & Fujiki, M. Sept., 350-358.
Lombard and sidetone amplification effects in normal and misarticulating children. Siegel, G. M., & Kennard, K. L. Mar., 56-62.
Management of sentence production demands. Kamhi, A. G., Catts, H. W., & Davis, M. K. Sept., 329-338.
Partner age as a variable in the conversational performance of specifically language-impaired and normal-language children. Fey, M. E., & Leonard, L. B. Sept., 413-423.
Reflectivity bias in picture-pointing grammatical comprehension tasks. Shorr, D. N., & Dale, P. S. Dec., 549-556.
Role of mothers' expansions in stimulating children's language production. Scherer, N. J., & Olswang, L. B. Sept., 387-396.
Symbolic play in normal and language-impaired children. Terrell, B. Y., Schwartz, R. G., Prelock, P. A., & Messick, C. K. Sept., 424-429.
Syntactic and conceptual factors in children's understanding of metaphors. Nippold, M. A., Leonard, L. B., & Kail, R. June, 197-205.
Words, objects, and actions in early lexical acquisition. Schwartz, R. G., & Leonard L. B. Mar., 119-127.

### Language Use in Adults

Consistency of effects of slow rate and pauses on aphasic listeners' comprehension of spoken sentences. Brookshire, R. H., & Nicholas, L. E. Sept., 323-328.

## Language Disorders

### Aphasia and Other Adult Language Disorders

Comparison between the motoric constraints for Amer-Ind and ASL sign formation. Daniloff, J. K., & Vergara, D. Mar., 76-88.

Consistency of effects of slow rate and pauses on aphasic listeners' comprehension of spoken sentences. Brookshire, R. H., & Nicholas, L. E. Sept., 323-328.

### Language Disorders in Children

Analysis of functions of delayed echolalia in autistic children. Prizant, B. M., & Rydell, P. J. June, 183-192.

Answers to wh-questions: A developmental study. Parnell, M. M., Patterson, S. S., & Harding, M. A. June, 297-305.

Anticipatory imagery ability in normal and language-disabled children. Savich, P. A. Dec., 494-501.

Comparison between the motoric constraints for Amer-Ind and ASL sign formation. Daniloff, J. K., & Vergara, D. Mar., 76-88.

Partner age as a variable in the conversational performance of specifically language-impaired and normal-language children. Fey, M. E., & Leonard, L. B. Sept., 413-423.

Preschoolers with language disorders: 10 years later. Aram, D. M., Ekelman, B. L., & Nation, J. E. June, 232-244.

Profiles of communicative and cognitive-social abilities in autistic children. Wetherby, A. M., & Prutting, C. A. Sept., 364-377.

Symbolic play in normal and language-impaired children. Terrell, B. Y., Schwartz, R. G., Prelock, P. A., & Messick, C. K. Sept., 424-429.

Use of contrastive stress in normal, aphasic, and autistic children. Baltaxe, C. A. M. Mar., 97-105.

### Learning Disabilities

Anticipatory imagery ability in normal and language-disabled children. Savich, P. A. Dec., 494-501.

Temporal integration of tone glides by children with auditory-memory and reading problems. Tobey, E. A., & Cullen, J. K. Dec., 527-533.

### Language Disorders in Mental Retardation

Comparison between the motoric constraints for Amer-Ind and ASL sign formation. Daniloff, J. K., & Vergara, D. Mar., 76-88.

Interactive basis of severely handicapped and normal children's acquisition of referential language. Koenig, M. A., & Mervis, C. B. Dec., 534-542.

### Language Disorders in Personality and Psychiatric Disturbances

Analysis of functions of delayed echolalia in autistic children. Prizant, B. M., & Rydell, P. J. June, 183-192.

## Assessment and Intervention

### Assessment

Consistency of effects of slow rate and pauses on aphasic listeners' comprehension of spoken sentences. Brookshire, R. H., & Nicholas, L. E. Sept., 323-328.

Interactive basis of severely handicapped and normal children's acquisition of referential language. Koenig, M. A., & Mervis, C. B. Dec., 534-542.

Profiles of communicative and cognitive-social abilities in autistic children. Wetherby, A. M., & Prutting, C. A. Sept., 364-377.

Reflectivity bias in picture-pointing grammatical comprehension tasks. Shorr, D. N., & Dale, P. S. Dec., 549-556.

Role of mothers' expansions in stimulating children's language production. Scherer, N. J., & Olswang, L. B. Sept., 387-396.

### Physiological Measures of Language Function

Visual evoked-response components related to speechreading and spatial skills in hearing and hearing-impaired adults. Samar, V. J., & Sims, D. G. June, 162-172.

### Intervention

Role of mothers' expansions in stimulating children's language production. Scherer, N. J., & Olswang, L. B. Sept., 387-396.

### Nonspeech Communications Systems

Comparison between the motoric constraints for Amer-Ind and ASL sign formation. Daniloff, J. K., & Vergara, D. Mar., 76-88.

Transparency of three communication symbol systems. Musselwhite, C. R., & Ruscello, D. M. Sept., 436-443.

# SPEECH

## Nature of Normal Speech

### Development of Speech and Voice

Lombard and sidetone amplification effects in normal and misarticulating children. Siegel, G. M., & Kennard, K. L. Mar., 56-62.

Simplification of /s/ + stop consonant clusters: A developmental perspective. Catts, H. W., & Kamhi, A. G. Dec., 556-561.

### Anatomy and Physiology of the Adult Speech

Elasticity of canine vocal fold tissue. Perlman, A. L., Titze, I. R., & Cooper, D. S. June, 212-219.

Influence of lung volume on the airflow-intensity relationship. Schneider, P., & Baken, R. J. Sept., 430-435.

Laryngograph as a measure of vocal fold contact area. Gilbert, H. R., Potter, C. R., & Hoodin, R. June, 178-182.

Lower-lip EMG and displacement during bilabial disfluencies in adult stutterers. McClean, M., Goldsmith, H., & Cerf, A. Sept., 342-349.

Physiologic stages of vocal reaction time. Shipp, T., Izdebski, K., & Morrissey, P. June, 173-178.

Recruitment thresholds of lower-lip motor units with changes in movement direction. McClean, M. D. Mar., 6-12.

Reproducibility and variability of speech muscle activity in athetoid dysarthria of cerebral palsy. Neilson, P. D., & O'Dwyer, N. J. Dec., 502-517.

### Perception of Speech

Application of theory of signal detection to dichotic listening. Katsuki, J., Speaks, C., Penner, S., & Bilger, R. C. Sept., 444-448.

Auditory perception of speech contrasts by subjects with sensorineural hearing loss. Boothroyd, A. Mar., 134-144.

Discriminability of the quality of amplitude-compressed speech. Nabelek, I. Dec., 571-577.

Effect of formant frequency onset variation on the differentiation of synthesized /w/ and /r/ sounds. Sharf, D. J., & Ohde, R. N. Sept., 475-479.

Harmonics-to-noise ratio and psychophysical measurement of the degree of hoarseness. Yumoto, E., Sasaki, Y., & Okamura, H. Mar., 2-6.

Prediction of contextual speech intelligibility from isolated word intelligibility measures. Schiavetti, N., Sitler, R. W., Metz, D. E., & Houde, R. A. Dec., 623-626.

Prosodic features and the intelligibility of accelerated speech: Syntactic versus periodic segmentation. Wingfield, A., Lombardi, L., & Sokol, S. Mar., 128-134.

Speech processing for cochlear implant prostheses. Millar, J. B., Tong, Y. C., & Clark, G. M. June, 280-296.

Tonal confusions in Thai patients with sensorineural hearing loss. Gandour, J., Carney, A., Nimitbunnasarn, C., & Amatyakul, P. Mar., 89-97.

## Speech and Voice Disorders

### Articulation and Resonance Disorders

Comments on the interaction of syntactic and phonological disorders [Letter]. Panagos, J. M., & Prelock, P. A. June, 318-319.

Lombard and sidetone amplification effects in normal and misarticulating children. Siegel, G. M., & Kennard, K. L. Mar., 56-62.

A procedure for phonetic transcription by consensus. Shriberg, L. D., Kwiatkowski, J., & Hoffmann, K. Sept., 456-465.

Reply to Panagos and Prelock [Letter]. Paul, R., & Shriberg, L. D. June, 319-320.

Reproducibility and variability of speech muscle activity in athetoid dysarthria of cerebral palsy. Neilson, P. D., & O'Dwyer, N. J. Dec., 502-517.

### Physiologically Based Speech Disorders

Mechanics of vocal fold vibration and laryngeal articulatory gestures produced by hearing-impaired speakers. Metz, D. E., Whitehead, R. L., & Whitehead, B. H. Mar., 62-69.

Production of intonation and contrastive stress in electrolaryngeal speech. Gandour, J., & Weinberg, B. Dec., 605-612.

Reproducibility and variability of speech muscle activity in athetoid dysarthria of cerebral palsy. Neilson, P. D., & O'Dwyer, N. J. Dec., 502-517.

**Stuttering and Other Fluency Disturbances**

Analysis of stutterers' voice onset times and fundamental frequency contours during fluency. Healey, E. C., & Gutkin, B. June, 219-225.

Disfluencies at the onset of stuttering. Yairi, E., & Lewis, B. Mar., 154-159.

Distribution of stuttering in sentences: Reliability to sentence length and clause position. Jayaram, M. Sept., 338-341.

Eye movements of stuttering and nonstuttering children during silent reading. Brutten, G. J., Bakker, K., Janssen, P., & van der Meulen, S. Dec., 562-566.

Lower-lip EMG and displacement during bilabial disfluencies in adult stutterers. McClean, M., Goldsmith, H., & Cerf, A. Sept., 342-349.

Sidetone amplification, noise, and stuttering. Martin, R. M., Siegel, G. M., Johnson, L. J., & Haroldson, S. R. Dec., 518-527.

Some environmental factors and hypotheses for stuttering in families with several stutterers. Cox, N. J., Seider, R. A., & Kidd, K. K. Dec., 543-548.

Stereotype formation by inference: A possible explanation for the "stutterer" stereotype. White, P. A., & Collins, S. R. C. Dec., 567-570.

Vocal and finger reaction times in stutterers and nonstutterers: Differences and correlations. Starkweather, C. W., Franklin, S., & Smigo, T. M. June, 193-196.

**Voice and Other Laryngeal Disorders**

Acoustic differentiation of laryngeal, esophageal, and tracheoesophageal speech. Robbins, J. Dec., 577-585.

Harmonics-to-noise ratio and psychophysical measurement of the degree of hoarseness. Yumoto, E., Sasaki, Y., & Okamura, H. Mar., 2-6.

Production of intonation and contrastive stress in electrolaryngeal speech. Gandour, J., & Weinberg, B. Dec., 605-612.

ASSESSMENT AND INTERVENTION

**Assessment**

Comparisons among three articulation sampling procedures with preschool children. Kenney, K. W., Prather, E. M., Mooney, M. A., & Zeruzal, N. C. June, 226-231.

Harmonics-to-noise ratio and psychophysical measurement of the degree of hoarseness. Yumoto, E., Sasaki, Y., & Okamura, H. Mar., 2-6.

A procedure for phonetic transcription by consensus. Shriberg, L. D., Kwiatkowski, J., & Hoffmann, K. Sept., 456-465.

**Acoustic Measures of Speech and Voice**

Acoustic differentiation of laryngeal, esophageal, and tracheoesophageal speech. Robbins, J. Dec., 577-585.

Effect of formant frequency onset variation on the differentiation of synthesized /w/ and /r/ sounds. Sharf, D. J., & Ohde, R. N. Sept., 475-479.

Formant-frequency differences between isolated whispered and phonated vowel samples produced by adult female subjects. Kallail, K. J., & Emanuel, F. W. June, 245-251.

Production of intonation and contrastive stress in electrolaryngeal speech. Gandour, J., & Weinberg, B. Dec., 605-612.

**Instrumentation for Diagnosis, Treatment and Research**

Laryngograph as a measure of vocal fold contact area. Gilbert, H. R., Potter, C. R., & Hoodin, R. June, 178-182.

Microprocessor-based speech processing system. Guillemin, B. J., & Nguyen, D. T. June, 311-317.

READING

Eye movements of stuttering and nonstuttering children during silent reading. Brutten, G. J., Bakker, K., Janssen, P., & van der Meulen, S. Dec., 562-566.

SPEECH OR VOICE PRODUCTION

Elasticity of canine vocal fold tissue. Perlman, A. L., Titze, I. R., & Cooper, D. S. June, 212-219.

Laryngograph as a measure of vocal fold contact area. Gilbert, H. R., Potter, C. R., & Hoodin, R. June, 178-182.

Lower-lip EMG and displacement during bilabial disfluencies in adult stutterers. McClean, M., Goldsmith, H., & Cerf, A. Sept., 342-349.

Mechanics of vocal fold vibration and laryngeal articulatory gestures produced by hearing-impaired speakers. Metz, D. E., Whitehead, R. L., & Whitehead, B. H. Mar., 62-69.

STEREOTYPES

Stereotype formation by inference: A possible explanation for the "stutterer" stereotype. White, P. A., & Collins, S. R. C. Dec., 567-570.

**PROFESSIONAL AND GENERAL SCIENTIFIC ISSUES**

PROFESSIONAL AFFAIRS

**Research Issues and Methodology**

Acoustic differentiation of laryngeal, esophageal, and tracheoesophageal speech. Robbins, J. Dec., 577-585.

Harmonics-to-noise ratio and psychophysical measurement of the degree of hoarseness. Yumoto, E., Sasaki, Y., & Okamura, H. Mar., 2-6.

A procedure for phonetic transcription by consensus. Shriberg, L. D., Kwiatkowski, J., & Hoffmann, K. Sept., 456-465.

Reflectivity bias in picture-pointing grammatical comprehension tasks. Shorr, D. N., & Dale, P. S. Dec., 549-556.

Stimulus duration and frequency discrimination for normal-hearing and hearing-impaired subjects. Hall, J. W., & Wood, E. J. June, 252-256.

Temporal gap detection in sensorineural and simulated hearing impairments. Florentine, M., & Buus, S. Sept., 449-455.

## TITLE INDEX

Acoustic differentiation of laryngeal, esophageal, and tracheoesophageal speech. Robbins, J. Dec., 577-585.

Acoustic-reflex adaptation: Morphology and half-life data for subjects with normal hearing. Wilson, R. H., McCullough, J. K., & Lilly, D. J. Dec., 586-595.

An alternate method for determining functional gain of hearing aids. Rines, D., Stelmachowicz, P. G., & Gorga, M. P. Dec., 627-633.

Analysis of functions of delayed echolalia in autistic children. Prizant, B. M., & Rydell, P. J. June, 183-192.

Analysis of stutterers' voice onset times and fundamental frequency contours during fluency. Healey, E. C., & Gutkin, B. June, 219-225.

Answers to wh-questions: A developmental study. Parnell, M. M., Patterson, S. S., & Harding, M. A. June, 297-305.

Anticipatory imagery ability in normal and language-disabled children. Savich, P. A. Dec., 494-501.

Application of theory of signal detection to dichotic listening. Katsuki, J., Speaks, C., Penner, S., & Bilger, R. C. Sept., 444-448.

Auditory perception of speech contrasts by subjects with sensorineural hearing loss. Boothroyd, A. Mar., 134-144.

Children's speech revisions for a familiar and an unfamiliar adult. Tomasello, M., Farrar, M. J., & Dines, J. Sept., 359-363.

Comments on the interaction of syntactic and phonological disorders [Letter]. Panagos, J. M., & Prelock, P. A. June, 318-319.

Comparison between the motoric constraints for Amer-Ind and ASL sign formation. Daniloff, J. K., & Vergara, D. Mar., 76-88.

Comparisons among three articulation sampling procedures with preschool children. Kenney, K. W., Prather, E. M., Mooney, M. A., & Zeruzal, N. C. June, 226-231.

Consistency of effects of slow rate and pauses on aphasic listeners' comprehension of spoken sentences. Brookshire, R. H., & Nicholas, L. E. Sept., 323-328.

Development of topic manipulation skills in discourse. Brinton, B., & Fujiki, M. Sept., 350-358.

Discriminability of the quality of amplitude-compressed speech. Nabelek, I. Dec., 571-577.

Disfluencies at the onset of stuttering. Yairi, E., & Lewis, B. Mar., 154-159.

Distribution of stuttering in sentences: Reliability to sentence length and clause position. Jayaram, M. Sept., 338-341.

Effect of age on prediction with the bivariate plotting procedure. Silman, S., Silverman, C. A., Showers, T., & Gelfand, S. A. Mar., 12-19.

Effect of formant frequency onset variation on the differentiation of synthesized /w/ and /r/ sounds. Sharf, D. J., & Ohde, R. N. Sept., 475-479.

Effects of click duration on the latency of the early evoked response. Beattie, R. C., & Boyd, R. Mar., 70-76.

Effects of reducing low-frequency amplification on consonant perception in quiet and noise. Gordon-Salant, S. Dec., 483-493.

Elasticity of canine vocal fold tissue. Perlman, A. L., Titze, I. R., & Cooper, D. S. June, 212-219.

Equal-loudness contours using subjective tinnitus as the standard. Penner, M. J. June, 274-279.

Eye movements of stuttering and nonstuttering children during silent reading. Brutten, G. J., Bakker, K., Janssen, P., & van der Meulen, S. Dec., 562-566.

Factors influencing the masking level difference in cochlear hearing-impaired and normal-hearing listeners. Hall, J. W., Tyler, R. S., & Fernandes, M. A. Mar., 145-154.

Formant-frequency differences between isolated whispered and phonated vowel samples produced by adult female subjects. Kallail, K. J., & Emanuel, F. W. June, 245-251.

Harmonics-to-noise ratio and psychophysical measurement of the degree of hoarseness. Yumoto, E., Sasaki, Y., & Okamura, H. Mar., 2-6.

Influence of lung volume on the airflow-intensity relationship. Schneider, P., & Baken, R. J. Sept., 430-435.

Initial Iowa results with the multichannel cochlear implant from Melbourne. Tyler, R. S., Lowder, M. W., Otto, S. R., Preece, J. P., Gantz, B. J., & McCabe, B. F. Dec., 596-604.

Interactive basis of severely handicapped and normal children's acquisition of referential language. Koenig, M. A., & Mervis, C. B. Dec., 534-542.

Laryngograph as a measure of vocal fold contact area. Gilbert, H. R., Potter, C. R., & Hoodin, R. June, 178-182.

Lombard and sidetone amplification effects in normal and misarticulating children. Siegel, G. M., & Kennard, K. L. Mar., 56-62.

Lower-lip EMG and displacement during bilabial disfluencies in adult stutterers. McClean, M., Goldsmith, H., & Cerf, A. Sept., 342-349.

Magnitude estimation of loudness I: Application to hearing aid selection. Geller, D., & Margolis, R. H. Mar., 20-27.

Magnitude estimation of loudness II: Loudness perception in presbycusic listeners. Knight, K. K., & Margolis, R. H. Mar., 28-32.

Management of sentence production demands. Kamhi, A. G., Catts, H. W., & Davis, M. K. Sept., 329-338.

Masked and unmasked pure-tone thresholds of infants and adults: Development of auditory frequency selectivity and sensitivity. Nozza, R. J., & Wilson, W. R. Dec., 613-622.

Masking of tinnitus compared to masking of pure tones. Tyler, R. S., & Conrad-Armes, D. Mar., 106-111.

Masking-level difference in filtered-random and amplitude-modulated noise. Wilson, R. H., Arcos, J. G., Brown, C. J., & Bennett, L. A. June, 267-274.

Mechanics of vocal fold vibration and laryngeal articulatory gestures produced by hearing-impaired speakers. Metz, D. E., Whitehead, R. L., & Whitehead, B. H. Mar., 62-69.

Microprocessor-based speech processing system. Guillemin, B. J., & Nguyen, D. T. June, 311-317.

Partner age as a variable in the conversational performance of specifically language-impaired and normal-language children. Fey, M. E., & Leonard, L. B. Sept., 413-423.

Physiologic stages of vocal reaction time. Shipp, T., Izdebski, K., & Morrissey, P. June, 173-178.

Postmasking effects of sensorineural tinnitus: A preliminary investigation. Tyler, R. S., Conrad-Armes, D., & Smith, P. A. Sept., 466-474.

Prediction of contextual speech intelligibility from isolated word intelligibility measures. Schiavetti, N., Sitler, R. W., Metz, D. E., & Houde, R. A. Dec., 623-626.

Preschoolers with language disorders: 10 years later. Aram, D. M., Ekelman, B. L., & Nation, J. E. June, 232-244.

A procedure for phonetic transcription by consensus. Shriberg, L. D., Kwiatkowski, J., & Hoffmann, K. Sept., 456-465.

Processing of cues for stop consonant voicing by young hearing-impaired listeners. Johnson, D., Whaley, P., & Dorman, M. F. Mar., 112-118.

Production of intonation and contrastive stress in electrolaryngeal speech. Gandour, J., & Weinberg, B. Dec., 605-612.

Profiles of communicative and cognitive-social abilities in autistic children. Wetherby, A. M., & Prutting, C. A. Sept., 364-377.

Prosodic features and the intelligibility of accelerated speech: Syntactic versus periodic segmentation. Wingfield, A., Lombardi, L., & Sokol, S. Mar., 128-134.

Psychophysical tuning curves in normal-hearing listeners: Test reliability and probe level effects. Stelmachowicz, P. G., & Jesteadt, W. Sept., 396-402.

Recruitment thresholds of lower-lip motor units with changes in movement direction. McClean, M. D. Mar., 6-12.

Reflectivity bias in picture-pointing grammatical comprehension tasks. Shorr, D. N., & Dale, P. S. Dec., 549-556.

Relation between reaction time and loudness. Humes, L. E., & Ahlstrom, J. B. June, 306-310.

Reply to Panagos and Prelock [Letter]. Paul, R., & Shriberg, L. D. June, 319-320.

Reproducibility and variability of speech muscle activity in athetoid dysarthria of cerebral palsy. Neilson, P. D., & O'Dwyer, N. J. Dec., 502-517.

Role of mothers' expansions in stimulating children's language production. Scherer, N. J., & Olswang, L. B. Sept., 387-396.

Self-report approach to assessing benefit derived from amplification. Walden, B. E., Demorest, M. E., & Hepler, E. L. Mar., 49-56.

Sidetone amplification, noise, and stuttering. Martin, R. M., Siegel, G. M., Johnson, L. J., & Haroldson, S. R. Dec., 518-527.

Simplification of /s/ + stop consonant clusters: A developmental perspective. Catts, H. W., & Kamhi, A. G. Dec., 556-561.

Some environmental factors and hypotheses for stuttering in families with several stutterers. Cox, N. J., Seider, R. A., & Kidd, K. K. Dec., 543-548.

Speech processing for cochlear implant prostheses. Millar, J. B., Tong, Y. C., & Clark, G. M. June, 280-296.

Standardization of a test of speech perception in noise. Bilger, R. G., Neutzel, J. M., Rabinowitz, W. M., & Rzeczkowski, C. Mar., 32-48.

Stereotype formation by inference: A possible explanation for the "stutterer" stereotype. White, P. A., & Collins, S. R. C. Dec., 567-570.

Stimulus duration and frequency discrimination for normal-hearing and hearing-impaired subjects. Hall, J. W., & Wood, E. J. June, 252-256.

Symbolic play in normal and language-impaired children. Terrell, B. Y., Schwartz, R. G., Prelock, P. A., & Messick, C. K. Sept., 424-429.

Syntactic and conceptual factors in children's understanding of metaphors. Nippold, M. A., Leonard, L. B., & Kail, R. June, 197-205.

Temporal gap detection in sensorineural and simulated hearing impairments. Florentine, M., & Buus, S. Sept., 449-455.

Temporal integration of tone glides by children with auditory-memory and reading problems. Tobey, E. A., & Cullen, J. K. Dec., 527-533.

Tonal confusions in Thai patients with sensorineural hearing loss. Gandour, J., Carney, A., Nimitbunnasarn, C., & Amatyakul, P. Mar., 89-97.

Tone-glide discrimination: Normal and hearing-impaired listeners. Collins, M. J. Sept., 403-412.

Transparency of three communication symbol systems. Musselwhite, C. R., & Ruscello, D. M. Sept., 436-443.

Tympanometric changes at 226 Hz and 678 Hz across 10 trials and for two directions of ear canal pressure change. Wilson, R. H., Shanks, J. E., & Kaplan, S. K. June, 257-266.

Use of contrastive stress in normal, aphasic, and autistic children. Baltaxe, C. A. M. Mar., 97-105.

Validity of hearing thresholds obtained from the rising portion of the audiogram in sensorineural hearing loss. Humes, L. E., Tharpe, A. M., & Bratt, G. W. June, 206-211.

Visual evoked-response components related to speechreading and spatial skills in hearing and hearing-impaired adults. Samar, V. J., & Sims, D. G. June, 162-172.

Vocal and finger reaction times in stutterers and nonstutterers: Differences and correlations. Starkweather, C. W., Franklin, S., & Smigo, T. M. June, 193-196.

Word recognition with segmented-alternated CVC words: A preliminary report on listeners with normal hearing. Wilson, R. H., Arcos, J. T., & Jones, H. C. Sept., 378-386.

Words, objects, and actions in early lexical acquisition. Schwartz, R. G., & Leonard L. B. Mar., 119-127.
